Office Memorandum • UNITED STATES GOVERNMENT

DATE: 8 February 1956

TO : AD/RR
Ch/E
FROM : Ch/D/S

SUBJECT: ICA Request for Information on Soviet Bloc Aid to Non-Bloc Countries

1. Attached are 5 copies of a paper, "Soviet Bloc Aid to Non-Bloc Countries" (Project 40.1032) prepared in response to a request from ICA for material which can be used in their forthcoming budget presentation to Congress.

2. All of the material presented except Tables II, III, V and VI may be completely declassified by appropriate CIA authorities. These tables could conceivably cause adverse reaction on the part of the countries enumerated and therefore should probably be classified as Official Use Only. All of the material contained in the paper can be derived from either open sources or classified sources which are neither covert nor sensitive. Neither the text nor the tables reveal the sources of the information contained therein. Until the classification is changed by appropriate authorities the paper should be handled as a secret document.

At the direction of the DD/I, the paper discussed in this memorandum is being made available to ICA as a SECRET document. However, ICA is being told that the originating Agency will not object to the use of any or all of this document in unclassified form, providing that the appropriate policy desks within the Department of State concur in such declassification for those sections relating to countries falling within their areas of responsibility.
